ELASTER RAF BT (PMB 45/80 – 75)

High performance polymer modified bitumen complying with EN 14023 standard and obtained by chemical reaction between the base binder and an elastomeric polymer. Specifically designed for warm mixtures.

Mixing temperature (ºC): 140 - 185.
Maximum heating temperature (ºC): 190.

Mixes to be transported during long times.
Anti-cracking mixes.
Rutting resistant asphalt.
Stone mastic asphalt and ultrathin mixtures.
High performance asphalt mixtures.

N.B: The recommendations in these technical specifications are purely for guidance and for general situations and Cepsa takes no responsibility whatsoever for misuse. For individual cases, contact Cepsa Technical Department.
